WITHDRAWN

BIENNIAL REPORT OF THE STATE BOARD OF PRISON DIRECTORS.

His Excellency, HIRAM W. JOHNSON, Governor of California:

SIR: As required by law, the State Board of Prison Directors hereby submit their report for the two years ending June 30, 1912.

CHANGES ON BOARD.

Since the last biennial report was filed, the following changes have taken place on the board: On July 24, 1911, Dennis M. Duffy, of San Francisco, California, became a member of the State Board of Prison Directors, succeeding Charles E. Clinch of Grass Valley, California, who resigned. On January 10, 1912, Charles L. Neumiller, of Stockton, California, became a member of this board, succeeding Robert T. Devlin, of San Francisco, California, whose term expired.

PRISON POPULATION.

On June 30, 1912, there were in prison at San Quentin, California, 1,913 men and 24 women, and at Folsom Prison, Represa, California, there were in prison 1,163 men, making a total of 3,100 men in prison. There were on parole from both prisons at that time 465 men, making a total of 3,565 prisoners, as against 3,254 on June 30, 1910.

Thus it may be seen that the prison population has increased. This is not surprising, however, when we take into consideration the increase in the population of the State for the same length of time.

PROGRESS IN PRISON MANAGEMENT AND PRISON DEVELOPMENT.

Slowly, but certainly, the state prisons of California are developing along the lines of greatest efficiency. Adequate prison accommodations, facilities and equipment, for which the board has long sought, seem now in a fair way of early provision. The Legislature has responded generously to our several requests and public sentiment has sustained our efforts to better prison conditions.

Unfortunately, however, the department of the state government to which was committed the improvement and reconstruction of our prison buildings and equipment has made such slow progress that we are still confining our prisoners in crowded cells and attempting to apply modern methods through antiquated prison plants. We are pleased to report that more rapid progress is now being made, and we have every reason to believe that our next biennial report will speak more of accomplishment than of prophecy in respect to the maturing plans of the board.

Notwithstanding the trying delays that have so seriously interfered with the work and plans of the board, much real progress has been made during the period covered by this report.

SAN QUENTIN PRISON.

New Construction.—The State Engineer, who has exclusive charge of building construction at San Quentin, advises that the new, reinforced concrete main cell building, containing eight hundred cells, will be ready for occupancy about January 1, 1913. He also advises that the new dining-room and kitchen, to be connected with the main building, will be completed in March, 1913. The walls enclosing the space between the main building and the older portion of the prison have not been completed, and the additional wall dividing this space into two proposed yards has not yet been commenced. Until these walls are completed and the yards thus made available, any effective classification and segregation of the prisoners is manifestly impracticable. It is hoped, therefore, that this work will be hastened to an early completion.

Sanitary Conditions.—The sanitary condition of the prison is good. The water supply and sewerage system have been improved, and are now first-class; the buildings and grounds are well policed, and all refuse is removed daily. The cells have been renovated and painted, and officers have been specially detailed to enforce the maintenance of their sanitary condition.

Present Dining-room and Kitchen.—The food supplied to the prisoners, while necessarily plain in character, is ample, varied, healthful, well prepared, and served as appetizingly as present housing facilities will permit. After each meal cooking utensils and the dishes used by inmates are sterilized by boiling in water, mess tables are scoured, and floors are scrubbed. Precautions are taken to keep flies away from foodstuffs. Improved equipment has been installed in the kitchen. The aged and the infirm have separate tables, with food especially prepared for them, and they are allowed a longer time than the others within which to eat. It is unreasonable to assume, of course, that men from every walk of life can be reduced to the simple and uniform dietary standard that must form a part of any prison régime, and all of them remain satisfied. When the new dining-room and kitchen shall come into use, modifications in the manner of serving meals can be made that will add to the contentment of the prisoners, and these improvements should, therefore, be completed as soon as practicable.

Health of Prisoners.—The general health of the inmates of the prison is at present excellent. A great proportion of those entering the institution are afflicted with some form of disease. All new prisoners undergo an immediate and thorough physical examination, any needed medical or surgical treatment being given at once, and this process has been extended as rapidly as possible to prisoners heretofore received.

Some of the best-known specialists of the State visit and hold clinics at the prison, giving to the prisoners the benefit of the most scientific technique known to surgery. Operations have been performed in craniotomy, appendectomy, leg amputation to relieve femoral thrombosis, mastoidotomy, and herniotomy. Some of the cases of hernia were of fifteen or twenty years' standing, with no previous treatment. Much

of the more notable and serious surgical work of the institution has been performed without charge by Dr. A. W. Morton, a prominent practitioner of San Francisco, whose interest in the welfare of the prisoners is gratefully acknowledged by the board.

Tubercular patients are immediately isolated, and there has recently been adopted a modified vaccine therapy under the able supervision of Doctors Fehleisen and Zieg.

Every prisoner found to be suffering from syphilis is given the newly-discovered "Salvarsan" treatment, a boon which many of them as free men would not have received, owing to the expense involved.

In the near future it is expected to introduce into the prison, with the assistance of Colonels Ebert and Frick of the army medical corps, the prophylactic inoculation against typhoid, now compulsory in the United States Army.

The sick receive the care of trained hospital attendants selected from among the inmates, some of them graduate doctors and nurses.

All inmates requiring dental work have their wants properly attended to at the expense of the State, and prisoners in need of eyeglasses have their eyes refracted, and if unable to purchase their own glasses, these are furnished by the State.

New Bath House.—A modern bathroom, containing fifty shower baths, each supplied with hot and cold and salt and fresh water, has been installed. There is also a swimming tank for plunge bathing. Every prisoner is compelled to bathe at least once a week, and at that time to exchange his clothes for clean ones from the laundry, extra flannels being issued wherever it is deemed necessary.

Women's Ward.—The building containing the women's ward has been completely overhauled and renovated, and several minor improvements added that tend to make it more cheerful, comfortable and sanitary.

School and Library.—In the very few years that have elapsed since the establishment at the prison of an elementary educational system, there has been developed, under the direction of the chaplain and with the assistance of qualified inmate teachers, a series of classes leading from the primary to the eighth grammar grade. Attendance upon these classes is entirely optional with the prisoner; at present about 175 adult students are upon the rolls. The avidity and earnestness with which these grown men enter upon their studies, some of them beginning with the alphabet, is indicative of the good results to be accomplished, and is ample justification for incurring future additional expense in the development of the prison school system.

The library, while somewhat handicapped at present for want of adequate facilities, contains several thousand volumes, upon which the prisoners may draw once a week, and to which they may have personal access on Saturdays. Prisoners are also permitted, at their own expense, to subscribe to the standard magazines and to purchase technical or instructive books.

Those prisoners possessing musical talent are given abundant opportunity for practice with the prison band and orchestra, and are permitted to have their own musical instruments.

Recreation.—Baseball knows no "closed season" at the prison, and the playing of this and similar games for exercise in the prison yards is heartily encouraged. The prison is well supplied with phonographs, and has over a thousand records that are played in different rooms on Sundays and holidays. The prisoners have their own vaudeville and theatrical companies, who rehearse freely for the entertainments on New Year's day and the Fourth of July. At intervals during the year lectures are delivered by persons prominent in the outside world in their respective callings.

Discipline.—There have been no escapes from the prison during the period covered by this report, and, save a disturbance incited in the dining-room by the more vicious element in June, 1912, the discipline has been excellent. The methods of enforcing obedience to the rules of the prison are sufficiently firm for the control of those vicious or degenerate characters, without whose restraint no institution, penal or otherwise, can exist, and they are yet sufficiently elastic to be unoppressive upon those who are amenable. Effort is made to have every prisoner understand that the rules are made and enforced for *his own* protection and benefit; that the prison authorities have a genuine interest in his welfare, and stand ready to help him when he evinces a disposition to help himself; that neither favoritism nor discrimination will ever be shown; that the guiding principle in the enforcement of the indispensable system of discipline to which he must conform is the "square deal."

Opium and drugs are no longer smuggled into the prison; fights and brawls among the inmates do not now occur; former bestial practices are practically suppressed; the men go to their work in an orderly manner instead of in mob formation; crowds are not allowed to congregate unless under the eyes of an officer, and promiscuous association among certain classes of prisoners is at all times forbidden.

The records of the prison show that, as a consequence of this policy, the general discipline is high, punishments are far less, and the tendency of the men to respond to their better impulses is appreciably greater.

Manufactures.—The act passed by the last Legislature, at the instance of your Excellency, enabling our state prisons to manufacture articles for state use, has already proven itself a wise and beneficial measure. For the first time in its history the institution finds it unnecessary to ask for supporting appropriations, except for salaries alone. There has been established, under the authority of this act, tailor, shoe, tin, machine, and printing shops and a furniture factory.

In the clothing shop are made all the uniforms, shirts, underclothes and caps used by the prisoners, as well as the citizen suits given to them upon their discharge. For the inmates of other state institutions are made full suits of clothing, both dress and service, and overalls, shirts and underclothes.

In the shoe shop are manufactured all classes and grades of footwear for the State's wards—men and women—from brogans to bedroom slippers.

The furniture factory turns out roll-top and flat-top desks, tables, chairs, bookcases, dressers and chiffoniers, of different woods and in different finish, as ordered by the department of the State government requiring them.

The tin shop makes milk and dish pans, milk, garbage and ash cans and buckets and kitchen utensils of all sorts from galvanized iron or tin.

The printing shop does institutional printing and book-binding, and makes the pasteboard boxes for the shoe shop.

The machine shop manufactures modern, fireproof safes, with combination locks, and enameled iron beds.

The product of these shops is now equal, in material and workmanship, to that of any other institution in the country. For the want of orders, however, the plants have not been taxed to their full capacity; did the demand exist, they could produce almost double the quantity of goods thus far manufactured during any given period.

The moral effect upon the men employed in these industries has been little short of marvelous. Modern equipment was installed in each instance, but where one man was discovered among the prisoners who knew his trade, it was found necessary to teach twenty. The prisoners are almost all of them anxious to be placed in the shops, and when so assigned they come to work in the morning with enthusiasm, show a livelier interest than those similarly employed outside prison walls, make enforcement of discipline superfluous, and in every way display appreciation of the opportunity thus afforded to learn a useful occupation. Men who entered the prison knowing no trade, now look forward with anticipation to going forth into the world and earning good wages. There are to-day discharged or paroled men in several of our cities earning \$30 a week who were not capable before entering the prison of earning that amount in a month.

The foregoing results in the manufacturing department have been accomplished without the employment of additional officers or guards.

The board will be glad to note an increase in the orders from state institutions requiring articles produced at the prison, so that the rehabilitation of men of this type may be extended to include many for whom there is no present opportunity.

FOLSOM PRISON.

Sanitary and Dietary Improvements.—At Folsom a ventilating system has been installed that insures a constant supply of fresh air for the prisoners in their cells. A new bathhouse with plunge, showers and tubs is nearing completion. The kitchen has been remodeled and from it goes to the prisoners' tables plain but wholesome and well-cooked food, cleanly served in a large, airy, well ventilated dining-room.

Supplies.—All supplies are carefully inspected and contractors are rigidly held to the terms of their contracts. Articles not up to the standard are promptly rejected.

Physical Examinations.—Upon his arrival, each new prisoner is given a thorough physical examination, a record of which is kept, and his physical health is thereafter an object of constant observation and care. Aside from the humanity of this course and its material value to the State in labor returns, experience has shown that a sound body is better than a weak one upon which to build sound moral and mental structures.

In connection with physical examinations and surgical and medical assistance, we beg to acknowledge indebtedness for the skillful and gratuitous services rendered Folsom Prison by—

Dr. C. A. Bricca, San Francisco, eye, ear, nose and throat;
 Dr. George A. Briggs, Sacramento, eye, ear, nose and throat;
 Dr. Roscoe A. Day, San Francisco, orthodontist and oral surgeon;
 Dr. G. A. Hubbell, San Francisco, tuberculosis examinations;
 Dr. Wm. C. Voorsanger, San Francisco, tuberculosis examinations;
 Dr. C. B. Jones, Sacramento, surgical operations.

Library.—The Folsom library contains 3,150 volumes, covering fiction, poetry, biography, history, education, science, and miscellaneous. The best magazines are also subscribed for by the prison and distributed among the prisoners. The Warden is making an earnest and conscientious effort to so suggest and guide the reading of the prisoners as to obtain the best mental and moral results for the individual prisoner.

Education.—As previously reported, we have no resident chaplain at Folsom, but the Warden is giving personal attention to the matter of education. In this he has been materially assisted by the State Superintendent of Public Instruction in the matter of text-books for prisoner students. The plans of the Warden include night schools, day schools, and training in the mechanical trades.

Recreation.—Music, baseball, athletics, and other field sports, with semiannual indoor entertainments, furnish wholesome recreation and entertainment for the prisoners.

In baseball some really fine teams have been developed whose play is followed with the keenest interest by the prison audience.

The prison band gives outdoor concerts every Sunday.

The vaudeville and minstrel performances, given every six months by the prisoners themselves, but censored and kept within proper limits by the Warden, relieve the monotony of prison life, bring needed cheer to the prisoners, and furnish a distinct aid to prison discipline.

Prison Discipline.—Prison discipline at Folsom has steadily improved and corporal punishment, which has been diminishing for several years last past, has now entirely ceased. Never in the history of the prison has the discipline been so good, and never before was corporal punishment entirely omitted.

The following extract from the current report of Warden Johnston of Folsom Prison clearly and tersely states the policy now governing the conduct of that prison:

The very moment a man reaches the gate and is turned over to our care, we begin the effort to fit him to go out again. Men should leave prison better than when they enter, and the betterment should be all-sided—mental, moral and physical. Our first aim is to put the man in good physical condition and give him possession of sound bodily health. If a man's condition is such that he is unable to work, we do not assign him to labor. When he is able, we put him to work. Every man gets plenty of good, plain food, plenty of fresh air, plenty of work, and all the wholesome amusement and recreation practicable to allow, and is encouraged in mental development and moral training. I have a personal talk with every man. The general overseer tries to learn all that he can of him and his ease and career. The captain of the guard does the same, and so does the turnkey. The physician examines him thoroughly. If physical defects are found, every effort is made to remedy them. Correspondence with relatives, particularly with parents, is encouraged. Habits of cleanliness and decency are aided—in short, we are doing everything that seems humanly possible to do to substitute health for sickness, industry for idleness, knowledge for ignorance, ambition for shiftlessness, self-respect for self-abasement and hope for despair.

Delayed Construction.—The construction of the wall, cell blocks and other buildings and structures necessary to proper segregation and classification is under the jurisdiction and control of the State Engineering Department. The early completion of this work is an imperative necessity and we sincerely hope it may not be much longer delayed.

THE INDETERMINATE SENTENCE.

In our last biennial report reference was made to the "indeterminate sentence," and its consideration by the Legislature was recommended.

We desire to renew this recommendation, and, in view of the doubtful authority of our Legislature to enact the necessary legislation in that behalf, we recommend the following:

PROPOSED CONSTITUTIONAL AMENDMENT.

Amend Article X of the Constitution of California by adding two (2) new sections thereto, to be numbered sections seven (7) and eight (8), and to read as follows:

Section 7. The Legislature shall by law provide for indeterminate sentences of imprisonment for persons convicted of crime.

Section 8. The Legislature shall by law provide for the custody, care, control, release, and discharge of all prisoners committed under indeterminate sentences.

PAROLES.

The parole law, enacted in 1893, has developed to a point where a separately organized force has become necessary for its proper execution.

Because of its partially experimental nature the parole law was for some years sparingly and cautiously employed. As experience demonstrated its usefulness and efficacy, paroles were increased, until now we are paroling annually nearly twice as many as were paroled during the first ten years after the law went into effect. We now have over 500 prisoners on parole, a number in excess of the total prison population of many states.

Properly to look after these men, scattered as they are over the State, is a task of stupendous magnitude and importance. It can scarcely be understood by those not familiar with it. The result to the State, however, is commensurate with all the time, money and effort expended in its accomplishment.

Were we permitted to disclose the names of those who have been restored to useful citizenship through the beneficent operation of the parole law, the roll would be a long one, and would include the names of many leading citizens of the communities in which they reside.

The incidental financial saving to the State is considerable, amounting at present to about \$60,000 a year, or about \$120,000 for the two years covered by a biennial appropriation.

As stated above, it has been necessary to organize a separate force to look after the parole work. This force consists of a parole officer and his assistants, and the necessary clerical help. The work consists of visits to the paroled men and their employers, finding work for men out of employment, protecting them against imposition, admonishing and encouraging them, writing and answering innumerable letters, receiving monthly reports, keeping an accurate record of the employment, conduct, thrift, and progress of the paroled men, and, in short, doing all the multitudinous things that are needful to the conversion of a prisoner into a useful and law-abiding citizen.

Heretofore, the expense attending the parole work has been borne by the two state prisons. This has been a cumbersome sort of method and is unbusinesslike. The work has now developed to a point where its cost should be covered by a separate item in the general appropriation bill.

We recommend that \$35,000 be set apart for expenses in connection with paroles for the two fiscal years 1913-14 and 1914-15.

This would be \$17,500 per annum, or about one fourth of the annual saving to the State by reason of the paroles.

PRISON LABOR.

The subject of the employment of prisoners was, until recently, a very serious one. For some years past, the sole employment of prisoners in San Quentin Prison was in the jute mill, in the manufacture of jute goods, and at Folsom, in the rock quarry. From the jute mill at San Quentin Prison quite a revenue has been and now is derived by the State from jute goods there manufactured. Practically no revenue has been derived from the employment of prisoners at Folsom Prison.

Efforts were repeatedly made to obtain legislative sanction to establish in the prisons industrial enterprises, so that a prisoner might be given an opportunity while in prison to prepare himself to earn a living when he was released from prison. The last Legislature enacted a law whereby permission was given to employ the prisoners in San Quentin Prison in manufacturing supplies for the public institutions of the State, for instance, furniture for public buildings and schools, clothing, shoes, etc., for the inmates of the different public institutions.

Despite a very strong protest, a protest that had made itself felt in past years, such a law was passed, and to-day in San Quentin Prison men who entered the prison without a trade of any kind are looking forward to the day of their discharge when they may go out into the world, capable of earning good wages and being useful and upright citizens.

REPORTS OF OFFICERS.

Contained herein are the reports of the wardens and officers of the two prisons, setting forth in detail the work, conduct and management of the prisons.

In conclusion, we wish to say that our work has been made easy by the fearless and consistent support given this board by your Excellency.

Respectfully submitted.

DENNIS M. DUFFY,
CHARLES SONNTAG,
W. R. PORTER,
TIREY L. FORD,
CHARLES L. NEUMILLER.

WARDEN'S REPORT.

November 8, 1912.

The Honorable, the State Board of Prison Directors.

GENTLEMEN: In submitting herewith for your consideration the reports of the various heads of departments of this institution for the sixty-second and sixty-third fiscal years, the necessity for any lengthy report of the affairs of the prison on my part is not apparent to me; at the same time, I deem it advisable to call your attention briefly to a few features which may prove of general interest to you.

PRISON POPULATION.

There has been a still further increase in our population for the past two years, and, as will be observed by the tabulated reports of the Turnkey, the daily average for that period was 1,899 199-366, being an increase in the daily average of 117 45-103 over the preceding two years.

The practice of the United States Government of committing Federal prisoners to this institution has apparently been practically discontinued, as we find that at the close of the sixty-third fiscal year only one such Federal prisoner is confined here, although the number of United States naval prisoners has steadily increased, showing thirty-nine at the close of the fiscal year.

DISCIPLINE.

With the exception of the disturbance which occurred here in June, 1912, our discipline has been excellent. The punishment record has been reduced to practically nothing, except in the cases of those who participated in the disturbance mentioned, and there have been no escapes during the past two years.

MAINTENANCE.

I am pleased to state that there has been a considerable reduction in the cost of maintenance, the average daily net cost per capita for the past two years having been reduced to \$.295. In connection with this reduction, there should be taken into consideration the fact that considerable expense has been incurred in the complete renovation of the female quarters by thoroughly overhauling and repairing the building, also putting in a large new steel range, new baths, new beds and new furnishings, in addition to thoroughly renovating the offices of the Captain of the Yard and the Turnkey.

PAROLE SYSTEM.

The results in detail of the operation of the parole system will be best obtained by reference to the tabulated report of the Turnkey.

HEALTH.

Generally speaking, the health of our inmates has been excellent, especially when their crowded condition is taken into consideration.

In this connection I deem it but just to mention the excellent work which has been performed by Doctor A. W. Morton, of San Francisco, co-operating with our Resident Physician and Medical Department. Doctor Morton's work, which has been chiefly of a surgical character, has been done entirely gratuitously, and the results of his labors in behalf of our prisoners speak volumes, both as regarding his skill as a practitioner, and his kindly interest as a man.

The total number of deaths for the two years is fifty-one, being twenty-two for the sixty-second, and twenty-nine for the sixty-third fiscal years.

APPROPRIATION.

In order to meet our requirements for the sixty-fourth and sixty-fifth fiscal years, I find that it will not be necessary to ask for any appropriation except for salaries, as, according to the present status of our finances, no appropriation for support will be needed.

If the industrial feature of the institution progresses as we have reason to expect, when the new machinery for the manufacturing of woolen, cotton and knit goods is installed, I do not believe that we will be required to ask the State for any further appropriation to meet the running expenses of the prison.

In this connection it seems appropriate to state that in my opinion some system should be devised and adopted whereby industrious prisoners may be compensated, pecuniarily, for their work. Under such a system any dependent outside friends of prisoners might be benefited by their labor here, and it appears to me also that such a plan would prove instrumental in maintaining the self-respect of a prisoner, as well as to aid him at the time of his discharge.

MANUFACTURING DEPARTMENT.

In addition to our chief industry, the prison jute mill, as you are aware, we have now in operation, and running very satisfactorily, the following industries: Furniture factory, foundry, machine shop, tailor shop, shoe shop, tin shop, and printing office. Generally speaking, we have the manufacturing business well in hand and are keeping up well with our orders.

The additional work devolving upon our manufacturing department as a result of the "State Use" law, passed at the last session of the State Legislature, has thus far been accomplished without increasing our force of employees.

COMPLETION OF NEW CELL HOUSE, AND CHANGES INCIDENT THERETO.

Our new cell house will be ready for occupancy about the first of January next, and at that time it will be practicable for us to commence the grading and classification of our prisoners, and adopt varied

uniforms, according to the different grades. This will mean practically an entire reorganization of the prison. The new cell house is considered one of the finest and most modern in the United States. The new dining-room and kitchen are well under way, and it is expected that they will be ready for occupancy by March, 1913.

EDUCATIONAL.

It will be observed from the report of the Chaplain, who, as your board is aware, also has charge of our prison school, as well as the library, that considerable more work along educational lines has been accomplished during the past two years than formerly. The character of such work has also been greatly improved.

Our day school has an average attendance of 120, in addition to the 54 prisoners of mature age who are taking advantage of the night school, and it is expected that this work will be extended as facilities are acquired for doing so, and I have no doubt that the results of the efforts being made in this respect will be conspicuously apparent in the improved character of our inmates.

CONCLUSION.

Whatever of success has been attained in the administration of the affairs of this institution during the past two years, I feel is due very largely to the faithful and hearty co-operation of your honorable Board as well as the officers and guards of the prison, and it is with pleasure that I take this opportunity of extending to the members of your Board, individually and collectively, also to the employees, my most sincere thanks.

Very respectfully,

JOHN E. HOYLE,
Warden.

CLERK'S REPORT.

CLERK'S OFFICE, CALIFORNIA STATE PRISON,
SAN QUENTIN, CAL., June 30, 1911.

To the Honorable, the State Board of Prison Directors.

GENTLEMEN: I herewith submit, in tabulated form, statements showing all financial transactions of this prison for the fiscal year ended June 30, 1911; together with a summary of assets and liabilities at said date.

Respectfully,

MARK E. NOON,
Clerk.

Average number of officers and employees during the year	114	1	115

Expenditures.

Current expenses.	Amount.	Total.
1. Salaries and wages	\$118,704 92	
2. Clothing	24,260 44	
3. Subsistence	97,294 67	
4. Ordinary repairs	5,807 86	
5. Office, domestic and outdoor expenses	78,285 97	
Total		\$319,343 86
EXTRAORDINARY EXPENSE.		
1. New buildings, land, etc. (see footnote)		
2. Permanent improvements to existing buildings		
Grand total		\$319,343 86

New cell houses and cottages for employees in course of construction are under the supervision of the State Department of Engineering, and the expense in connection with said buildings are paid from a special appropriation for that purpose, controlled by the Department of Engineering.

CLERK'S REPORT.

CLERK'S OFFICE, CALIFORNIA STATE PRISON,
SAN QUENTIN, CAL., June 30, 1912.

To the Honorable, the State Board of Prison Directors.

GENTLEMEN: I have the honor to submit herewith, in tabulated form, statements showing all financial transactions of this prison during the fiscal year ended June 30, 1912; together with a summary of assets and liabilities at said date.

Respectfully,

MARK E. NOON,
Clerk.

JUTE MILL DEPARTMENT.

SAN QUENTIN, CAL., July 1, 1912.

Hon. JOHN E. HOYLE, Warden.

SIR: I herewith submit to you the annual report of the Jute Mill Department for the sixty-third fiscal year, ending June 30, 1912.

Respectfully,

IRVING T. BALLARD,
Commissary.

**STATEMENT OF RAW JUTE AND MANUFACTURED GOODS OF THE JUTE
MILL DEPARTMENT FOR THE FISCAL YEAR ENDING JUNE 30, 1912.**

RAW JUTE.

2,695 bales jute in warehouse June 30, 1911 at 400 lbs.	1,078,000 lbs.	
88 bales jute in jute mill June 30, 1911, at 400 lbs.	35,200 lbs.	
6,047 bales jute received during year at 400 lbs.	2,418,800 lbs.	
4,000 bales jute received during year at 396.4 lbs.	1,585,603 lbs.	
In process of manufacture July 1, 1911	109,339 lbs.	
		5,226,942 lbs.
4,020 bales jute on hand June 30, 1912	1,608,000 lbs.	
100 bales jute on hand June 30, 1912	39,640 lbs.	
15 bales jute in jute mill June 30, 1912	6,000 lbs.	
In process of manufacture July 1, 1912	168,937 lbs.	
		1,822,577 lbs.
Net weight of raw jute used during the year		3,404,365 lbs.

MANUFACTURED GOODS.

3,990,825 grain bags—4,333,171 yards at 11.04 oz.	3,087,384 lbs.	
3,990,825 grain bags sewed at $\frac{1}{4}$ oz.	62,497 lbs.	
4,039,825 grain bags hemmed at 1/16 oz.	15,780 lbs.	
Jute rope used in baling 7,965 bales at 3 lbs.	23,895 lbs.	
Sewing twine used in baling 7,965 bales at $3\frac{1}{4}$ oz.	1,742 lbs.	
Burlap used in wrapping 7,965 bales at $6\frac{1}{2}$ lbs.	51,772 lbs.	
3,998,825 grain bags tied in bundles at $1\frac{1}{4}$ oz.	9,956 lbs.	
36,500 bean bags at 9 oz.	20,531 lbs.	
73 bales bean bags baling and cordage at $10\frac{1}{2}$ lbs.	767 lbs.	
1,215 $\frac{1}{2}$ yards 32-inch burlap at 1 lb.	1,215 lbs.	
1,704 $\frac{1}{2}$ yards Napier matting at 3 lbs.	5,114 lbs.	
20 bales, special order, 21 by 36, at 10 lbs.	200 lbs.	
Loom waste manufactured	21,459 lbs.	
Miscellaneous sales, 45-inch burlap	3,697 lbs.	
Miscellaneous sales, 5-ply twine	696 lbs.	
		3,306,705 lbs.
Loss in manufacture		97,660 lbs.
Equals 2.895 per cent.		

GRAIN BAG STATEMENT FOR THE FISCAL YEAR ENDING JUNE 30, 1912.

GRAIN BAGS.

Bags sold prior to July 1, 1911, awaiting orders for shipment	1,120,100	
Bags sold during the year at 6 cents	1,222,500	
Bags sold during the year at $6\frac{1}{4}$ cents	3,668,150	
Bags sold during the year at 7 cents	874,675	
		6,885,425
Bags shipped during the year	5,872,825	
Bag sales annulled	3,000	
		5,875,825
Bags sold awaiting orders for shipment	1,009,600	
In excess of manufacture	601,600	
		408,000
Bags on hand, sold, awaiting orders for shipment		
Bags on hand June 30, 1911	2,290,500	
Bags manufactured during the year	3,990,325	
		6,280,825
Bags shipped during the year	5,872,825	
		408,000
Balances due on bags sold prior to July 1, 1911	\$57,058 45	
Bags sold at 6 cents, 1,222,500	73,350 00	
Bags sold at $6\frac{1}{4}$ cents, 3,668,150	229,259 40	
Bags sold at 7 cents, 874,675	61,227 25	
Forfeited deposits	17 10	
		\$420,912 20
Cash received from balances on bags sold prior to July 1, 1911	\$56,904 55	
Cash received from sale of bags at 6 cents	73,350 00	
Cash received from sales and balances on bags at $6\frac{1}{4}$ cents	148,425 37	
Cash received from deposits on bags at $6\frac{1}{4}$ cents	26,424 40	
Cash received from sales of bags at 7 cents	61,227 25	
Value of bags annulled	171 00	
		366,502 57

Balance due on grain bag sales June 30, 1912 \$54,409 63

BEAN BAGS.

Bags sold during the year at $6\frac{1}{4}$ cents	499,650	
Bags shipped during the year		
Bags sold in excess of manufacture	499,650	
Bags on hand June 30, 1912		
Bags sold at $6\frac{1}{4}$ cents, 499,650		\$31,228 13
Cash received from deposits on bags at $6\frac{1}{4}$ cents		3,121 30

Balance due on bean bags sales June 30, 1912 \$28,106 83

TURNKEY'S REPORT.

SAN QUENTIN, CAL., June 30, 1911.

Hon. JOHN E. HOYLE, Warden of State Prison at San Quentin, Cal.

DEAR SIR: I beg to submit herewith my annual report for the fiscal year ending June 30, 1911.

Very respectfully,

D. SULLIVAN,
Turnkey.

TABLE No. 1.

TABLE No. 13.

Statement of Average Terms Served by Prisoners Discharged During Sixty-second Fiscal Year.

Expiration of sentence	419
419 prisoners served 11,990 months, an average of 2 years, 4 months and 19 days each.	
Paroled (2 reparaoled)	232
218 term prisoners served 7,019½ months, an average of 2 years, 8 months and 2 days each.	
14 life prisoners served 2,189½ months, an average of 13 years and 4 days each.	
232 prisoners served 9,209 months, an average of 3 years, 3 months and 1 day each.	
Pardoned	5
5 term prisoners served 262½ months, an average of 4 years, 4 months and 6 days each.	
Commuted	3
3 term prisoners served 32½ months, an average of 10 months and 8 days each.	
Died	20
19 term prisoners served 521½ months, an average of 2 years, 3 months and 5 days each.	
1 life prisoner served 28 months, an average of 2 years and 4 months.	
Transferred	14
14 term prisoners served 295½ months, an average of 1 year, 9 months and 1 day each.	
Discharged, but not included in this average	15
1 executed, 4 for resentence, 2 out as witness, 7 for new trial, 1 out on writ.	
Total discharged	708
Not to be included in average	15
Basis for average	693

TOTALS.

Term prisoners—	
678 discharged prisoners served 20,122½ months, an average of 2 years, 5 months and 20 days each.	
Life prisoners—	
15 prisoners served 2,217½ months, an average of 12 years, 3 months and 25 days each.	
Grand total—	
693 prisoners discharged during sixty-second fiscal year served 22,339½ months, an average of 2 years, 8 months and 7 days each.	

TURNKEY'S REPORT.

SAN QUENTIN, Cal., June 30, 1912.

To Hon. JOHN E. HOYLE,

Warden of State Prison at San Quentin, California.

DEAR SIR: I beg to submit herewith my annual report for the fiscal year ending June 30, 1912.

Very respectfully,

D. SULLIVAN,
Turnkey.

TABLE No. 1.

CAPTAIN OF THE GUARD'S REPORT.

CAPTAIN OF THE GUARD DEPARTMENT,
SAN QUENTIN, CAL., June 30, 1911.

To Hon. JOHN E. HOYLE,
Warden of the State Prison, San Quentin, California.

SIR: I hereby submit my report for the fiscal year ending June 30, 1911.

During the past year there were received on commitment to this prison six hundred and sixty-six (666) prisoners, while the discharges for the year numbered seven hundred and three (703).

I am pleased to report that there were no escapes or attempts to escape during the year, which goes to show that the guards strictly attended to their duties.

No opium or other narcotics were smuggled into the prison during the past year.

I would recommend that one dozen short-barreled shotguns be purchased for the armory, as our present guns have been in use for a number of years, and are becoming unserviceable. I would also recommend that 32x40 Winchester rifles be exchanged for our guns in use, as the smaller caliber and lighter guns would be more serviceable, and I think that they could be exchanged with little expense.

Our annual target practice has been going on for the past two months, and the men continue to improve their averages above past years.

I am pleased to report that all the men under my charge have attended strictly to their duties, and the discipline has been excellent, and by their hearty co-operation, my duties have been made a pleasure.

I append herewith in tabulated form my report on the number of prisoners received and discharged from this institution during the past fiscal year; also the number of prisoners visited by relatives and friends, also a record of the number of visitors shown through the prison during the fiscal year.

Yours respectfully,

E. V. ELLIS,
Captain of Guard.

CAPTAIN OF THE GUARD'S REPORT.

OFFICE OF THE CAPTAIN OF THE GUARD,
SAN QUENTIN, CAL., July 1, 1912.

Hon. JOHN E. HOYLE,

Warden California State Prison, San Quentin, California.

SIR: I have the honor to submit herewith my report for the fiscal year ended June 30, 1912.

During the past year there was received on commitment to this prison 837 prisoners, while the discharges for the year numbered 781.

Our annual target practice has been going on for several weeks, and the men continue to raise their averages above last year's practice.

The prison has been kept free from opium and other narcotics during the past year, and the guards have been vigilant and attentive in their various duties.

There has been no attempt to escape during the past year.

Twelve Winchester 25x35 carbines were purchased during the month of June, for use in our armory.

I am pleased to report that all the men have attended strictly to their duties, and the discipline has been excellent, which has made my duty a pleasure.

I append herewith, in tabulated form, my report on the number of prisoners received and discharged during the past fiscal year; also the number of prisoners visited by relatives and friends, also a record of the number of visitors shown through the prison during the fiscal year.

Yours very respectfully,

E. V. ELLIS,
Captain of the Guard.

DISTRIBUTING OFFICER'S REPORT.

SAN QUENTIN, CAL., June 30, 1911.

To Hon. JOHN E. HOYLE,

Warden State Prison at San Quentin, Cal.

SIR: I have the honor to submit herewith my annual report, in tabular form, for the sixty-second fiscal year, commencing July 1, 1910, ending June 30, 1911.

Respectfully submitted,

W. S. GILLETT,
Distributing Officer.

RESIDENT PHYSICIAN'S REPORT.

SAN QUENTIN, CAL., June 30, 1912.

Hon. JOHN E. HOYLE,

Warden of State Prison at San Quentin, Cal.

SIR: I have the honor of submitting herewith an annual report in tabular form of the Medical Department for the sixty-third fiscal year ending June 30, 1912.

Respectfully submitted,

H. NEWTON KIERULFF, M.D.,
Resident Physician.

TABLE No. 1.

Diseases Treated in Hospital Each Month during Sixty-third Fiscal Year.

Classification.	1911.					1912.					Total.
	July	August	September	October	November	December	January	February	March	April	
Abscess of antrum	1				1						2
Abscess of axilla	1	1					1	1			4
Abscess of brain										1	1
Abscess of ischio-rectal								1	1		2

CHAPLAIN'S REPORT.

SAN QUENTIN, CAL., June 30, 1911.

To Hon. JOHN E. HOYLE,
Warden of State Prison at San Quentin, California.

SIR: I herewith present my report as Resident Chaplain of State Prison at San Quentin for the year ending June 30, 1911.

The Chaplain's Department as at present constituted embraces the library and educational work in addition to the moral and religious interests.

THE LIBRARY.

We have discarded 77 books, added 358 by purchase and received 357 as gifts, resulting in a net increase of 638 for the year. There have also been added 73 bound volumes of current magazines.

Many donations of magazines and periodicals have been received for distribution through the library.

Our issues of books during the year amounted to 41,722, or an average of 3,477 per month—almost double the number of the preceding year.

One thousand and twenty-five prisoners and 60 employees are drawing books. A year ago the percentage of prisoners drawing books was 44, while at this date 55 per cent are making demands upon the library for reading matter. A little less than 68 per cent of books drawn are classed as romance and fiction.

The bindery to the date of its removal to another department in June had made 400 blank books; bound, rebound or repaired 660 books; and made 5,000 tablets for the various departments of the prison.

THE SCHOOL.

In July, 1910, we had 100 in the day school, and this number gradually increased until January, when the attendance reached 120. That number has been maintained as the average attendance the first six months of 1911. In December it became necessary to add a fourth man to the teaching staff. Notwithstanding the advance in numbers, the work and discipline of the school have both steadily improved. We have more supplies to work with than formerly, though still handicapped in our general equipment. Through the kindness of the Ladies Auxiliary of the California Prison Commission, which sent us \$25.00 with which to purchase school books, and the State Board of Prison Directors, which authorized the further purchase of \$60 worth of books, we are fairly well supplied with text-books for the present. The need of individual school desks is very great, and it would be a decided advantage to have a suitable guard assigned to the chapel during school hours.

The following data regarding our students may be of interest:

Nearly 60 per cent are of foreign birth.

The average age is 21 years.

Their average sentence is 4½ years.

Sixty-three were admitted during the year who had no previous schooling.

Only 12 of our present number had gone beyond the fourth grade outside.

Twenty-four of the more advanced pupils have completed our course of eight grades.

Students are advanced each month if capable of doing the work.

Of the 120 now in school 16 are engaged in learning some useful trade outside of the two hours spent in school each day.

In addition to the day school, we have two night schools in operation to render some assistance to students too advanced in years to be admitted to the day school. Thirty-five men are thus provided for at the present; but this number could be greatly increased were we in a position to conduct night school in the chapel with the advantage of the better facilities for teaching them.

MORAL AND RELIGIOUS INTERESTS.

Chapel services have been conducted regularly by both the chaplain and the visiting chaplain, Rev. Father Phillips, throughout the year. Religious meetings have also been conducted monthly by the Salvation Army, the Volunteers of America, and other organizations and individuals interested in the moral and spiritual welfare of the prisoners. Nine prominent clergymen have addressed the prisoners on Sundays or other holidays in response to the chaplain's invitation, including the Rev. Chas. N. Lathrop of the Protestant Episcopal Church; the Rev. Dr. Bovard, editor of the *California Christian Advocate*; and Bishop Edwin H. Hughes of the Methodist Episcopal Church. Much interest has been added to the religious services through the addition of 300 new song books which the Prison Directors permitted the chaplain to select and purchase, and by securing the attendance of the members of the orchestra with the choir at chapel exercises.

We are under obligation to the American Bible Society, The Bible House of Los Angeles, and other publishing or distributing houses for their continued generous response to every appeal for Bibles and religious literature to be distributed among the prisoners.

The chaplain has during the year held interviews with about one thousand men, listening to their stories, or questioning them regarding the causes of their downfall, and offering such suggestions or counsel as each case would call forth. I have delivered twelve addresses in different cities of the State during the year in response to invitations to speak on some phase of the subject of criminology.

Permit me in concluding this brief summary of the work of my department to express my appreciation, sir, of the attention you have courteously given to such suggestions as I have offered from time to time regarding the moral and spiritual interests of the institution of which you stand at the head; and also my grateful acknowledgment of the kindly co-operation of the Captain of the Yard, Mr. S. L. Randolph, in carrying forward my work.

Respectfully submitted.

WILLIAM H. LLOYD,
Resident Chaplain.

CHAPLAIN'S REPORT.

SAN QUENTIN, CAL., June 30, 1912

To Hon. JOHN E. HOYLE,

Warden of State Prison at San Quentin, California.

SIR: I herewith present my report as Resident Chaplain of the State Prison at San Quentin for the year ending June 30, 1912.

In addition to the moral, religious and general educational work, the Chaplain's Department has charge of the prison library and prison schools.

This report will be confined mainly to statistics, as I have been connected with this work only since May 15th of this year (the date of my induction).

THE LIBRARY.

We now have 5,196 books, being a net increase of 866 for the year; having discarded 23, added 889, by purchase 566, and by gifts 323.

These books within the limitation of their number fairly represent current, as well as classical and standard fiction, historical, scientific and reference works. A very serviceable and excellent catalogue has recently been compiled, whereby the works on hand have been segregated into the following classifications:

Romance and fiction.

Miscellaneous, standard literature, essays, etc.

History, historical romance, biography, topography and travel.

Religious and religious biography.

Poetry, fine arts, music, painting, etc.

Science, Christian Science, philosophy and theosophy.

Useful arts, agriculture, mechanical trades, etc.

Sociology, education, law, statistics and politics.

Works of reference and in foreign languages.

Catholic division.

Current magazines are bound quarterly, and 182 bound volumes have been added during the year. These bound volumes are in constant use, and evince an encouraging disposition on the part of the inmates to keep in touch with the subjects of current discussion and progress.

A portion of the library is separately designated as the Catholic Library. It contains books on general as well as religious subjects, and is available to all without distinction of sect.

We are indebted to many who are interested in prison work for donations of magazines and periodicals to be distributed to the prisoners through this department.

During the year the total issues of books amounted to 45,104—an average of 3,758 per month. Of this number slightly more than 60 per cent were drawn from the romance and fiction class.

The right of drawing books is accorded to all prisoners and officials. Of the 1,937 prisoners, 1,196 avail themselves of the privilege—a percentage of 61.7, and of the 118 officials, 101, a percentage of 85.6.

THE SCHOOL.

Our school has maintained its full complement of 120 during the year. The teaching staff consists of four prisoners. The work and discipline of the school have been a source of gratification. The need of individual school desks is decided. We aim to carry each boy through eight grades. Our general equipment is fair, but it would be of great advantage to have a fund whereby much-needed text-books and other equipment could be secured. There are ten boys now in school who have completed the eight grades and are taking up commercial courses.

Pupils are advanced as rapidly as they are capable of doing work, some completing the lower grades in one or two months.

We have, in addition to the day school, two night schools in operation, thus enabling those prisoners too advanced in years to permit of their attendance upon the day classes, to receive practical and useful instruction. We are taking care of fifty-four men in this way.

MORAL AND RELIGIOUS INTERESTS.

Chapel services have been conducted throughout the year regularly on alternate Sundays, by the chaplain and the visiting chaplain, Rev. Father Phillips, or one of his assistants. The Salvation Army and the Universal Brotherhood and Theosophical Society have also conducted monthly meetings. Much interest and efficient help have been added to our work by the recent addition of the California Christian Endeavor Union for monthly services.

The Jewish inmates have been addressed on different occasions by representatives of the Federated Jewish Charities of San Francisco.

I have made it a point during my incumbency to encourage personal interviews and confidence on the part of the prisoners. I have devoted a considerable part of my time to this kind of work among them, believing it productive of much possible benefit in shaping for the better their future course. Every prisoner is given a personal interview on the day of his arrival, and thereafter as often as opportunity presents or necessity arises.

I am pleased to advise you that in the short time of my service the importance of penological questions in the public mind has been manifested by numerous invitations extended to me to address various assemblages. I have so far been able to accept only a few of these invitations. I am glad to report that general appreciation was expressed at the meetings which I have addressed for the good work carried on, and advantageous results achieved by the officials of this institution.

I acknowledge the cordial and efficient co-operation and support of the Warden, the Clerk of the Board, Mr. M. E. Noon, the Captain of the Yard, Mr. S. L. Randolph, and the other officials, in my work.

I can not conclude this report without an expression of appreciation for the effective work, organizing ability and influence of my predecessor, Chaplain W. H. Lloyd.

Respectfully submitted.

W. J. CALL, Chaplain.

BIENNIAL REPORT

OF THE

STATE PRISON AT FOLSOM

WARDEN'S REPORT.

STATE PRISON AT FOLSOM, November 30, 1912.

To the Honorable State Board of Prison Directors.

GENTLEMEN: I have the honor to submit herewith report of the State Prison at Folsom for the sixty-second and sixty-third fiscal years, also suggestions and recommendations for future development. My appointment as Warden being made practically at the close of the period dealt with in the statistical part of the report, I do not feel it incumbent upon me to make any comment upon the reports of the heads of the various departments of the prison, but report them with the statement that the ground is well covered. Detailed information concerning population, health, age, nativity and occupation of the prisoners, cost of maintenance, value of products, shipments of rock and financial operations of the institution will be found in the reports of the Clerk, General Overseer, Captain of the Guard and Physician.

GENERAL CONDITIONS.

When I assumed charge June 1, 1912, I found that there was practically no money to work with—that is to say, no funds to amount to anything or surplus savings of regular appropriation that might be used for improvement. It had been, as it is now, necessary to use the total amount of money appropriated for support purposes, which ought to cover all ordinary repairs, for support alone, thereby causing neglect along the line of necessary upkeep and much-needed improvements.

IMPROVEMENTS.

By strict economy and close supervision of expenditures we have managed to attend to some of the most urgent needs, such as the placing of electric lights at main entrance gate and in the center of double gates, and also along main driveway; new sinks in prison kitchen; enlargement of storeroom, repairs to galleries in cell buildings, and complete new roof on prison dining-room.

Other improvements of greater importance and greater urgency, such as auxiliary pumps to help maintain our water supply during the summer months, a satisfactory method of ventilating the cell building and necessary facilities for bathing, were of such cost that there was no prospect of being able to pay for them out of regular funds at my command. When the urgency of these matters was presented to his Excellency, Hiram W. Johnson, Governor, Hon. A. B. Nye, Controller, and John F. Neylan, C. L. Seavey and Fred C. Nelles of the Board of Control, they responded by allowing the amount of money necessary from the emergency fund, and their prompt co-operation has enabled us to have the use of the auxiliary pumps during the time of greatest need, to install a ventilating system, already in successful operation, and to build a bathhouse, which is nearing completion.

AUXILIARY PUMPS.

The installation consists of two "Krogh" five-inch horizontal water-balanced centrifugal pumps, used in auxiliary capacity during low-water period, when water power is insufficient to operate regular pumps. Tests made July 21, 1912, showed a delivery of 105,000 gallons to the reservoir in two hours. The pumps ran very smoothly and are well able to endure a long run.

VENTILATING SYSTEM.

Each cell is provided with an exhaust grille in connection with a six-inch cylindrical duct, which is carried up several feet above the cell tier. All the ducts are connected to mains running over each tier, and all brought together at the joining of the buildings, where a fan, operated by motor, exhausts through the roof to atmosphere, affording a perfect system of ventilation. The system above described satisfactorily exhausts the impure air. The next step is to get a sufficient amount of fresh air into the cells. We are at work now boring the cell doors. They are, as you know, solid, not grated, built of three-eighth-inch boiler plate. With an air compressor drill we are boring holes in each door. When we finish the work every cell will intake air through fifty-six three-quarter-inch perforations and one large opening, and the impure air will be exhausted.

NEW BATHHOUSE.

The new bathhouse is nearing completion, and will, in all probability, be in use by the time this report is printed. It certainly will supply facilities long needed, and will be a measure of common humanity. The plans for this building have been furnished by the Department of Engineering. In size, it will be about the area of the Chapel and located closely adjoining. To be exact, the total area will be 82 feet 6 inches by 43 feet, which will give us room for a plunge 18 by 40 feet; twenty-eight showers, properly partitioned; six tubs for old and infirm inmates, and six tubs to be used exclusively by those afflicted with skin and blood diseases.

ADMINISTRATION.

I have given close personal attention to administering the business affairs of the institution, and through orders to the commissary and the stewards have insisted on the most rigid inspection of all supplies purchased, particularly items of subsistence. Every precaution is being taken to see that we get full weight, full count, full measure and quality, in accordance with specifications from every contractor. Articles not up to standard are rejected. In this part of the work I have had the co-operation of the officers, the backing of the Board of Control and the helpful assistance of the Pure Food Laboratory of the State Board of Health.

DISCIPLINE.

So far as discipline is concerned, I can truly say that it is good, very good. I hardly see how we could reasonably expect it to be better. Officers and guards who have been a long time in the service tell me that, as a matter of fact, they have never known it to be as good. But more convincing than personal opinions or impressions stands the record.

Percentage of population committing infractions of the rules during a similar period, June to November, during the years 1902 to 1912, are shown as follows:

1902, .127 per cent.	1908, .189 per cent.
1903, .141 per cent.	1909, .131 per cent.
1904, .221 per cent.	1910, .105 per cent.
1905, .335 per cent.	1911, .097 per cent.
1906, .185 per cent.	1912, .083 per cent.
1907, .221 per cent.	

There is less infraction of the rules now than at any time in the history of the prison. That is particularly important and significant when considered in connection with the fact that I have absolutely refrained from the use of any form of corporal punishment.

HEALTH OF PRISONERS AND MEDICAL ATTENTION.

Recently we have adopted the plan of giving every newcomer a thorough physical examination at the time he is received. Receiving as we do many men who have long been exposed to the vicissitudes of wandering, irregular, and criminal lives, it is evident that there must of necessity be some who come to us in bad shape. Indeed, it is quite likely that in some cases wretched physical condition is the cause of irritation that leads to crime or at least contributes to criminal tendencies. The result of the examination is recorded and filed with the examining physician's recommendations. If special medical attention is required and recommended by the examining physician, it is secured. In this connection, I desire to say that in addition to the faithful and painstaking work of the resident physician and surgeon, Dr. Chas. F. Gladding, I have been fortunate at various times in the past six months, in securing the specially skilled services of the following who have rendered their services without pay and frequently at considerable expense to themselves:

- Dr. C. A. Bricca, San Francisco, diseases of eye, ear, nose and throat;
- Dr. George A. Briggs, Sacramento, diseases of eye, ear, nose and throat;
- Dr. Roscoe A. Day, San Francisco, orthodontist and oral surgeon;
- Dr. G. R. Hubbell, San Francisco, tuberculosis examinations;
- Dr. C. B. Jones, Sacramento, surgical amputations;
- Dr. Wm. C. Voorsanger, San Francisco, tuberculosis examinations.

The death rate is very low, and, generally speaking, the health of the prison population is very good, which is in part accounted for by regular living, sufficient sleep and outdoor work.

EDUCATIONAL.

My plan is to start a night school immediately, teaching the elementary branches to the illiterate, and more advanced courses to each man in accordance with his present educational status and his needs; later, a day school, and also shop-training for the men who want to learn trades. The results will be good. I have no doubt that education along proper lines will be of decided advantage not only to men who are sincere in their desire to reform, but also to illiterates whose very ignorance may have contributed to their first conviction. It will be my endeavor to so arrange enrollment that the first to be admitted will be those who by their general conduct show a desire to make the most of the opportunities which the school will afford. We are indebted to the State Superintendent of Public Instruction for a large supply of textbooks furnished without cost.

LIBRARY.

Mental awakening through the stimulus of good books produces good results. I am doing everything possible to build up our library and to induce the men to make the greatest possible use of it. Our books are carefully selected and so far as possible we try to guide the reading so as to secure greatest benefits to the individual. We have on our shelves and catalogued at the present time some 3,150 volumes—fiction, poetry, biography, history, educational, scientific, and miscellaneous. We also subscribe for all the popular magazines and in addition to those subscribed for by individuals we receive for general distribution 224 copies of the best magazines monthly.

RELIGIOUS SERVICES.

The moral and spiritual welfare of the men is constantly kept in view, and judging from the attendance at services of all denominations there is a desire on the part of many men to improve. Attendance is of course voluntary and no measures are used to compel men to attend Chapel, but we do try to make services attractive and both our chaplains, Reverend Father M. J. Cahir, Catholic, and Reverend Jas. T. MacGovern, Episcopalian, are unremitting in their labors and attention to the men, faithfully answering every call for their services.

ENTERTAINMENTS.

The band is a constant source of enjoyment to the inmates and for that reason deserves encouragement. The instruments are not as good as they might be, but I hope to be able to provide new ones during the coming year. Baseball is the favorite sport and several crack teams furnish good exercise for the players and fun for the entire population every Sunday. Occasionally we have other field sports, such as run-

ning. Fourth of July we had as special entertainment vaudeville and moving pictures and field and track events, such as running, jumping and boxing matches. Thanksgiving we had baseball, running, music, and dancing. Both days passed without a single untoward incident and the behavior of the men was exemplary. For Christmas we are planning a minstrel performance. These shows brighten up the monotony of ordinary prison life to a desirable degree and an occasional entertainment, held within proper bounds, is, I believe, a great aid to better discipline.

TREATMENT OF PRISONERS.

The very moment a man reaches the gate and is turned over to our care we begin the effort to fit him to go out again. Men should leave prison better than when they enter and the betterment should be all-sided—mental, moral and physical. Our first aim is to put the man in good physical condition and give him possession of sound bodily health. If a man's condition is such that he is unable to work, we do not assign him to labor. When he is able, we put him to work. Every man gets plenty of good, plain food, plenty of fresh air, plenty of work and all the wholesome amusement and recreation practicable to allow, and is encouraged in mental development and moral training. I have a personal talk with every man. The general overseer tries to learn all that he can of him and his case and career. The captain of the guard does the same, and so does the turnkey. The physician examines him thoroughly. If physical defects are found, every effort is made to remedy them. Correspondence with relatives, particularly with parents, is encouraged. Habits of cleanliness and decency are aided—in short, we are doing everything that seems humanly possible to do to substitute health for sickness, industry for idleness, knowledge for ignorance, ambition for shiftlessness, self-respect for self-abasement and hope for despair.

RECOMMENDATIONS.

The most important step that can be taken in the management of the prison is to institute a system of paying wages to men who do good work. Such a plan will make for more efficient management, for greater product, will insure the success of the plan of manufacturing articles for use in the other state institutions, and will have a deep and lasting, and sometimes determining, influence on the future careers of men leaving here after serving their time anxious to rehabilitate themselves in the world outside. Our population during the past two years has averaged 1,112.88. During the next two years it will probably increase. To start paying wages to this number of men would require a very large sum, perhaps more than it would be advisable to spend. I believe that selection of best workers should be made carefully in the beginning. An appropriation of \$40,000 for each year would enable us to make a start. I heartily and earnestly recommend this to your consideration and urge that the legislature be requested to make the necessary appropriation.

APPROPRIATIONS REQUESTED.

These are arranged in the order of their importance or I should say, urgency, because, as a matter of fact, one is about as necessary as the other—indeed, some of the items that I have on the list, Nos. 6 and 7, for example, are, in a certain sense, the most important and should be attended to without delay.

1. Completion of cell buildings-----	\$121,327 00
2. Completion of wall-----	51,805 00
<hr/>	
If combined in one appropriation, as at present-----	\$173,132 00
3. Shop buildings, which means consolidation of the regular carpenter shop, paint and tin shops, as well as provision for regular manufacturing plant, with necessary tools, machinery and material-----	33,060 00
4. Construction of laundry buildings and installation of equipment-----	11,000 00
5. Construction of new cell building, which is planned to connect present buildings with those under construction and for which nothing has been heretofore appropriated-----	16,400 00
6. General improvements and repairs, which is a combination of a number of items originally presented under separate heads and which includes repairs to prison roof, to officers' and guards' building, residences, chapel, posts and towers, lining reservoirs with concrete and recovering same, hospital and dispensary repairs and equipment, and reconstruction of photograph gallery, barber shop and clothing room-----	23,500 00
7. General improvements on farm, including construction of horse barn, dairy barn, pigpen, chicken-houses, purchase of stock and implements, all very necessary and which have been cut by me to a figure that is conservative-----	20,000 00
8. Removal of hill back of new cell buildings, so as to give desirable yard space, necessary to carry out plans for classification and segregation of prisoners (the engineer in figuring this estimated that it would be necessary to remove 122,200 cubic yards, of which 78 per cent is granite and 22 per cent decomposed granite)-----	14,000 00
<hr/>	
Total amount requested for special appropriations-----	\$291,092 00

I have gone carefully over the estimate submitted for general appropriations, and I conscientiously believe that everything requested is necessary for proper management and earnestly urge you to recommend the same. The figures are:

For support sixty-fifth and sixty-sixth fiscal years-----	\$264,000 00
For salaries sixty-fifth and sixty-sixth fiscal years-----	200,000 00
For printing sixty-fifth and sixty-sixth fiscal years-----	2,500 00
<hr/>	
	\$466,500 00

There were several other items of importance and all of them are needed, but none of them are as urgent as those named above, and while I would like to have the appropriations and make the improvements as contemplated, I prefer to forego them rather than take any chances on the items that are most necessary.

In conclusion, I wish to express my sincere appreciation of the confidence shown in me by my appointment and to express the hope that my efforts to fulfill your desires and properly interpret and carry out your policy of fair, enlightened and humane treatment of the men under our charge will warrant your approval and support.

Respectfully,

JAMES A. JOHNSTON, Warden.

CLERK'S REPORT.

STATE PRISON AT FOLSOM, July 1, 1912.

To the Honorable, The State Board of Prison Directors.

GENTLEMEN: I herewith submit for your consideration full statements of the financial transactions of the State Prison at Folsom for the sixty-second and sixty-third fiscal years ending June 30, 1912.

Respectfully submitted.

J. E. HOSIER,
Clerk.

RESIDENT PHYSICIAN'S REPORT.

STATE PRISON AT FOLSOM, July 1, 1911.

Hon. W. H. REILLY, Warden of State Prison, Folsom, Cal.

DEAR SIR: I herewith submit report of prisoners treated by the Resident Physician of State Prison at Folsom for the year ending June 30, 1911, showing all transactions in the Medical Department.

Respectfully submitted.

A. E. INGERSOLL,
Resident Physician.

CAPTAIN OF THE GUARD'S REPORT.

STATE PRISON AT FOLSOM, CAPTAIN'S OFFICE,
July 17, 1912.*Hon. J. A. JOHNSTON, Warden.*

DEAR SIR: I herewith render my biennial report for the past two years, to wit, from July 1, 1910, to July 1, 1912.

You will find hereto attached a tabulated statement of the labor report of all departments for each and every month, also a statement of lost labor during said time, and average daily population each month. You will note in the statement the greater amount of lost labor comes in the months of November, December, and January, the winter months, as the prisoners are not worked when it is raining.

The shipping report you will find attached, which speaks for itself. You will note that the first fiscal year there were more cars of rock shipped out than in the last year. The shipping has been carefully and promptly attended to, and more shipping would have been done if cars could have been furnished.

I am pleased to state that the guard line is in good condition, and that the deportment and the attention of the men to their duties has been very good. During the past two years there has been quite a few changes on the guard line, largely due to guards resigning on account of sickness, being able to better their condition, and some who did not take kindly to this class of work. In the past two years there have been dismissals, all of which were for good and sufficient reasons. Hereto attached you will find a monthly statement for the past two fiscal years of officers and guards appointed, resigned, and dismissed.

Also attached you will find statement of number of prisoners punished for violations of the rules. You will also note that there were less punishments in the second fiscal year, showing marked improvement in the prisoners and discipline of same. This record is excellent, and far surpasses the discipline shown by former administrations. Few, if any prisons, of over one thousand prisoners can show less violation of rules.

All assignments to labor have been carefully made to the best interests of the prison and its discipline.

The tobacco of the prison has been carefully looked out for, and distributed to each prisoner at the proper times, and I am pleased to say, seldom, if ever, has there been any complaint in the past two years.

All knives, scissors, watches and razors are recorded, described, and charged up to the ones that are using them.

The general work of the office, to wit, keeping pay roll, punishment book, making out commitments, reports, requisitions, cell changes, and various other duties have been promptly and carefully attended to.

The guard detail has been carefully kept up and every post filled, when sufficient guards were on hand. Some times on account of sickness or absence, the line has been short. For the better discipline and safety of the prison, a couple more guards would be quite a help; or if these could not be had, a couple of extra men without regular pay would be a great help.

During the past two years the railroad track between the prison and Folsom has been kept in good condition, at times very hard work to keep it so, on account of lack of material. During the winter months kept seven men in the track gang, and during the summer five men have been sufficient. The track at present time is in very fair condition.

The sand that has been needed for all uses at the prison has been brought across the river from the sand dune, making a great saving to the State.

The receiving of all goods shipped to the prison has been promptly attended to and cared for; also the removal of ice from the power house, and the removal of spawls from the stone yard. In this relation, two or three flat cars belonging to the prison would be a great aid to the work.

The work of the clerk and the timekeepers has been carefully and conscientiously done. There has been every attention to detail, and as much care taken by them as if they were paid employees. A careful check has been kept on all prisoners coming out and going into the prison, four times a day at the gate, and twice a day a check has been taken while out at work, and a general notation kept of every thing going on during the day.

There has been installed in the office since May 23, 1909, a cell registering cabinet for the tobacco distribution, and a card system, which keeps a complete record of every prisoner from the time he comes in until he goes out, a more complete description of same is as follows.

CARD SYSTEM.

Upon receipt of a prisoner he is allotted three (3) cards in the filing cabinet, one filed numerically, one alphabetically, and one to the particular work to which he has been assigned. These cards contain his prison register number, his name, date of entering prison, date of expiration of sentence, length of sentence, county he was convicted in, nature of crime, his nativity, age and occupation, together with his being assigned to work and the nature of the work, also his cell number. All changes effecting the prisoner are entered on these cards from time to time, such as change of work, changes of cell, punishments, etc., together with date and full particulars, a complete record of the prison during his term of imprisonment.

A separate card for each month containing the names of the prisoners and date of discharge; separate card for each prisoner and date of future discharges. Separate card containing the name, date, time paroled, and expiration of parole of all paroled prisoners. Separate cards containing the name and date of all escaped prisoners on parole.

Separate cards containing name and date of prisoners transferred to asylums. Separate cards containing the names and dates of all prisoners escaped from the prison. Separate cards containing the name and date of all life prisoners. These cards are all filed in a steel filing cabinet for safety.

CELL ROSTER.

This contains a plan of the prison cell house, hospital, punishment cells and dungeons. Under every cell number in a separate apartment are placed cards containing registration number, name of prisoner and kind of tobacco used. This is used in case of prisoners being transferred from cell to cell, obviating any chance for mistakes in tobacco distribution.

Each nationality has a separate colored card, viz., Caucasians, green card; negroes, white card; Japanese, red card; Chinese, yellow card, and Indians, pink card. These cards have been a great addition and help to the office, curtailing and simplifying the work.

The guard posts are as follows: No. 1, 6, 12, 15, 17, and 18 are stone posts, and in good condition; posts 3, 4, 5, 7, 8, 10, 11, and 13 are wooden posts, and in poor condition; post 14, valley horse and extra valley posts in fair condition; wall post in good condition, but needs an awning during the summer time; 16, ditch 3, and quarry post 1 are temporary posts and liable to be moved at any time; post on power house could be improved by enlarging same, so the guard could walk around inside; post 9, bell post, hospital post, and the dungeon post are in good fair condition.

The improvements most needed are bathing accommodations for the prisoners; an overhauling of the officers' and guards' laundry, and a new stove and boiler for same. A new photograph gallery and officers' and guards' barber shop. The prison laundry would be improved very much by the addition of a mangle, when it can be afforded.

Nearly all departments in and about the prison are well cared for and protected with two exceptions, the power house and the tailor and shoe shops. Nearly everything made of steel and iron is made or finished in the power house, and there should be a free man there at all times to see what is being turned out, and that no contraband articles be made. A guard should also be placed in the immediate charge of the tailor and shoe shops to see all that is being done, and that no contraband articles be made.

On account of lack of funds, quite a few things needed have been held back, such as tools, hose and lawn mowers for the garden and lawn uses.

The protection from fire is very inadequate at present, there being only 150 feet of fire hose available. Should have at least 150 feet more hose to put on the hose cart. There should also be 150 feet of fire hose on a reel in the upper yard of the prison.

Armament of the prison and what we need for the present uses are as follows: We have 44 30-30 rifles in use, and as there are 50 guards

that have rifles assigned to them, I suggest that we have 6 more 30-30 rifles, then every guard could carry a 30-30 rifle. As it is, most of them carry 30-30 rifles and the rest of them carry 45-70 rifles. The 45-70 rifles are old and out of date; the 30-30 rifles are in very good condition, excepting a few that have had bad handling, not more than 6, and they are to be relied upon if the right man is behind the gun.

We are short on pistols for the night watch, and have been for some years. If it were not for some of the night watch carrying their own private pistols, we would not have enough to go around. We have 31 or 32 men on the night watch, including the chief and lieutenant, and only 26 pistols for them. I suggest that we have 6 more pistols for the night watch.

We are in need of about 6 more pistol holsters and belts, and by repairing what we have will put them in good shape. We need also about 500 rounds of .41 caliber pistol cartridges.

I would suggest that in purchasing new pistols, the .41 Colts side action would be proper, as we have 24 .41 Colts pistols, and then the watch would carry the same pistol throughout.

We should have about 8 new 30-30 cartridge belts, as some of our old ones are about worn out.

I think I have explained to you all the needs of the armory at the present time.

In conclusion, will report that the past two years have shown excellent management of the prison, and that the next two years will be an improvement on the preceding.

Very respectfully,

JAMES RUSSELL,
Captain of the Guard.

GENERAL OVERSEER'S REPORT.

REPRESA, SACRAMENTO COUNTY, August 14, 1912.
Mr. J. A. JOHNSON, Warden, Folsom State Prison.

DEAR SIR: I have the honor to hand you herewith the biennial report of this department, July 1, 1910—June 30, 1912.

Yours very respectfully,

J. A. AGUIRRE,
General Overseer.
